# The Fiscal Cliff is Mostly about Revenue

- Revenue impacts will largely be felt by non-states (feds, corporations, individuals).
- Any state impact is likely to be positive (except for states that allow deduction for federal taxes paid).
  - A 2013 windfall is likely if dividend and capital gains rates are unsettled at year-end.

# The Fiscal Cliff is not a Cliff

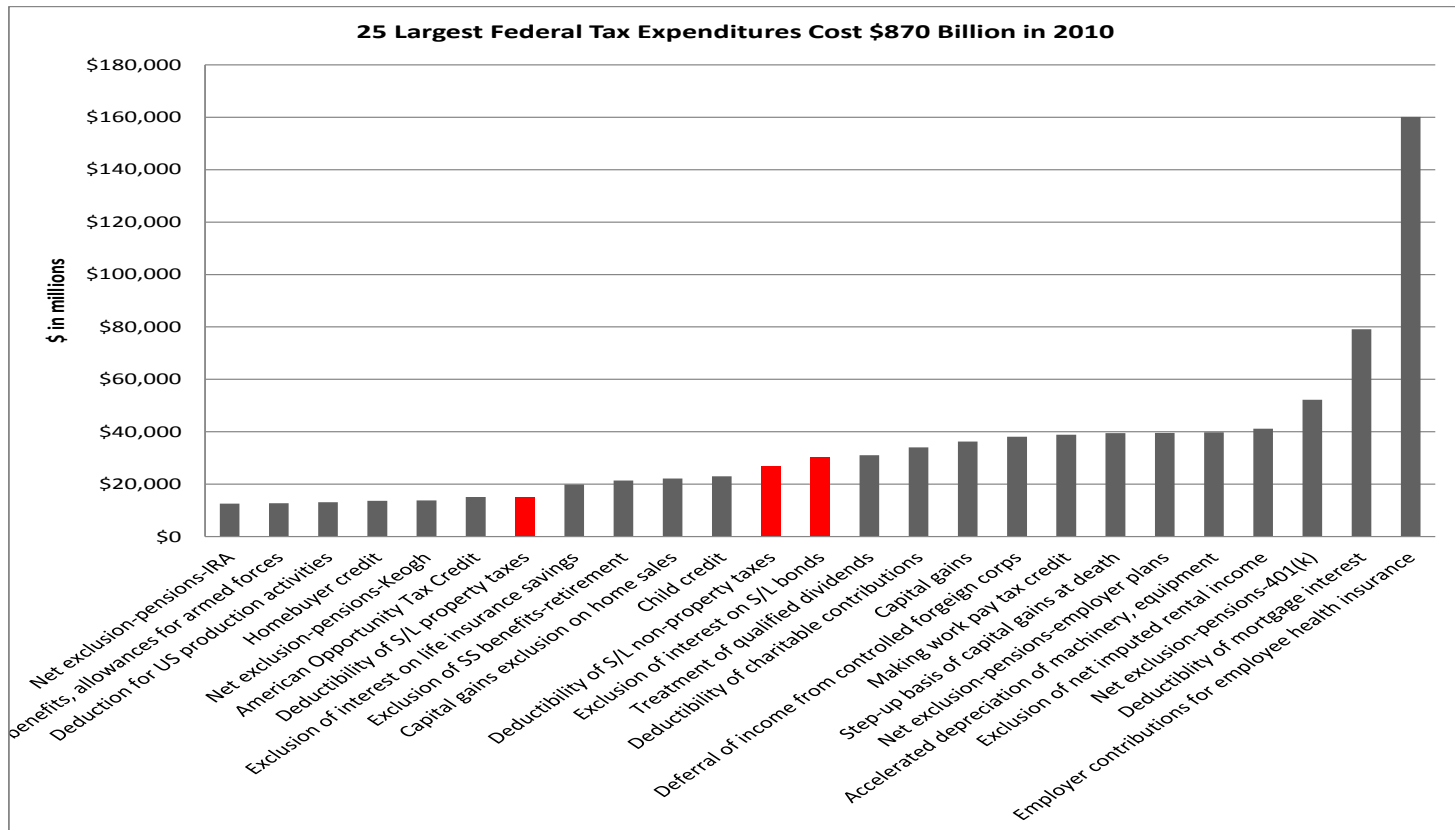

- The administration can forestall both tax increases and budget cuts
  - Leave tax withholding tables unchanged
  - Isolate sequester to final quarter of FY 2013
- The effects of the cliff are already being felt
- The world won't change overnight
- The biggest impact will be economic, not fiscal
